

Getting Started With CareCredit

Processing a Purchase

For patients who already have a CareCredit card, purchases using CareCredit are processed similarly to all other purchases in AXIS. In the Purchases tab within the patient record, products that can be purchased with CareCredit will have an available tender type in the dropdown.

AXIS Steps

- 1 Select the desired product and Available Adjustment
- 2 In the Tender Type dropdown, select **CareCredit***.
*Eligible products only. If the product does not have the CareCredit entry in the tender type, then CareCredit cannot be used for that purchase.
- 3 Enter the full amount of the purchase.
CareCredit cannot be used as part of a split payment. AXIS will display an error if the full amount is not entered.
- 4 Complete the required forms. After completion, select the **Complete CareCredit Transaction** button.
- 5 AXIS will start the communication with CareCredit. When the success message appears, select the **Open CareCredit Portal** button.

Products

Open CareCredit Portal

Getting Started With CareCredit

CareCredit Steps

1. Follow the prompts in the CareCredit pop-up. To move forward after selections, scroll to the bottom then select the continue/next button.
2. Select **Transaction**
3. Select **Purchase**
4. Select **Submit a purchase transaction in office for the patient/client.**

Enter the patient's CareCredit card number, or Look up the account.

Account Lookup

AXIS will pre-populate as much information as possible into the pop-up.

The easiest way is to look up by the default option (Name and Phone Number).

Validate the patient account and information before selecting the **Select** button.

Getting Started With CareCredit

Receipts

All CareCredit transactions require a signed receipt. Signed receipts must be retained for 25 months as outlined in the CareCredit Operations Guide.

Print the receipt and obtain a signature from the patient.

Offer to send or print a receipt for the patient's records.

SEND RECEIPT

PRINT RECEIPT

The CareCredit receipt does not replace any agreements. All purchase agreements (e.g., package agreement) must be completed in addition to the CareCredit receipt.

Processing a Refund

1. Select the CareCredit transaction in AXIS.
2. Select Refund/Void in the Action dropdown.
3. Complete the refund following regular procedures—using CareCredit as the Refund Type.
4. In the Refund Transaction, select the **CareCredit Portal** button.
5. Follow the prompts on the CareCredit portal pop-up.
6. Verify the refund details then select **Submit**.
7. Upload a copy of the refund receipt to the patient record in AXIS. Print or send a copy of the refund receipt to the patient.*

*Signatures on refund receipts are highly recommended, but not required.

The screenshot shows the 'Transaction History' table in the AXIS system. The table has columns: Name, Receipt, Type, Product Purchased, and Purchase ID. Three transactions are listed, all with 'Receipt' as the receipt type and 'One Time' as the type. The 'Action' dropdown menu is open, showing options: 'Download PDF', 'Receipt', and 'Refund / Void'. The 'Refund / Void' option is highlighted.

Dropping A Pending Transaction

If a CareCredit transaction is in Pending status, the Purchase tab is unavailable until the transaction is completed or dropped.

To complete the transaction, you will need to click on the Purchase tab, and then on the Open CareCredit Portal button. This will open a popup, then you will need to click the green box icon and follow the transaction steps.

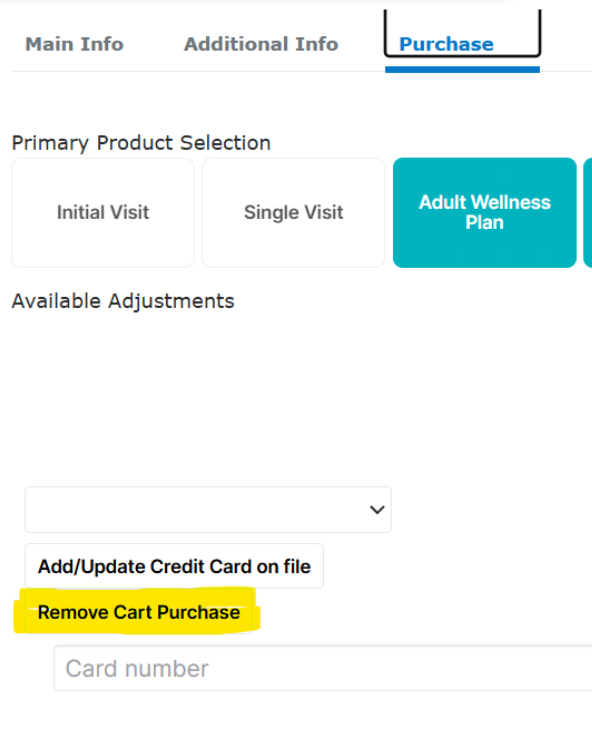

If you receive the following error: the transaction will need to be dropped and started over since the session with CareCredit has expired.

Your session Has Expired

If you want to start a new session, please close this window and start again.

If a patient's CareCredit application has been declined, then you will need to drop the transaction in order to proceed with a different payment type.

To drop the transaction, navigate to the Purchase tab and click Remove Cart Purchase. This will drop the pending transaction and unlock the purchase tab for further processing.

The screenshot shows the 'Purchase' tab selected in a navigation bar with 'Main Info' and 'Additional Info'. Below the navigation bar, there are three buttons for 'Primary Product Selection': 'Initial Visit', 'Single Visit', and 'Adult Wellness Plan'. Under 'Available Adjustments', there is a dropdown menu, a button 'Add/Update Credit Card on file', and a button 'Remove Cart Purchase' which is highlighted with a yellow background. Below these buttons is a text input field labeled 'Card number'.

CareCredit Applications

Fair Lending regulations require that anyone who requests credit may apply. If a patient requests information or an application for CareCredit, the only acceptable reply is to provide the patient with the information and/or application.

Acceptable responses may include:

"Absolutely, you can scan this QR code for additional information and a link to the application or I can send you a link. Which would you prefer?"

OR

"Here's a brochure with some additional information and a QR code for the online application."

CareCredit applications are available in English and Spanish.

Promotional Financing

The availability of promotional financing offers must be consistently shared with patients when they apply for credit.

Patients must be informed about the different special financing options available to them and how these promotions work **before** choosing which option to use for their purchase.

ID and Signatures

All CareCredit transactions **must occur in-person**—no over-the-phone transactions—and the patient must present valid ID. A signature must be obtained on both the purchase agreement (e.g., Package Agreement) and on the CareCredit receipt.

Signed CareCredit receipts must follow the outlined retention policy as outlined in the Operating Guide.

Follow all operating guidelines as outlined in the Operating Guide provided by CareCredit (Synchrony). This information is provided for convenience and reinforcement. For a full list of terms and operating guidelines, see the documents provided by CareCredit.
